Finance and Operations

An SIS fusion company

Real Estate Management by fusion the apps people

Efficiently manage a complex real estate portfolio and keep up with digital trends.

Our cloud-based corporate real estate management software delivers a modern user experience with a clear view of space utilisation, facility costs, global portfolio compositions, and financial performance – all in real time.

Adopt new tools for building and facility performance

Visualise your building data and gain critical insight into space utilisation, infrastructure, energy costs, and more with our smart building solutions and devices, combining real-time data from ERP and building automated systems.
